Convert Your Power Bill to Solar Equity

<http://thesolardoc.com>

The history of power bills is that they continue to increase at least once per year. Depending upon location and power company, the average increase is 5% to 9% per year.

Chart assumptions: (**Losses** and **Savings** increase and decrease by amount of average power bill)

1. Average power bill of \$150/month (\$1800/year)
2. Average Increase of a conservative 5%/year.

Results?

1. The figure in **RED** at the bottom of the **Power Bill** column is the amount of money a homeowner flushes down the drain renting their electricity from the power company from 2016-2041.
2. The figure in **GREEN** at the bottom of the **Solar Savings** column is the amount of money that a homeowner banks over that same period of time by Going Solar in 2016.

HOW?

The strategy that produces that dramatic switch is to **Convert Your Power Bill to Solar Equity™**.

Ask yourself these 3 power bill questions:

1. *How long have people been paying power bills?* Answer: Since **1881**
2. *How long have you been paying a power bill?* ANSWER: _____
3. *What is the date your power bill is paid up like your mortgage is?* ANSWER: **NEVER**.

That is every homeowner's reality ... **EXCEPT THOSE GOING SOLAR!**

Most solar sales presentations begin with a telemarketer talking you into having a door-to-door salesperson come to your home. We do NOT. PowerBillSolutions.com believes in providing you with the information you need to consider by email and phone so that you can make your decisions in the comfort, privacy and convenience of your home! **YOU decide when it is time to talk in person!**

How does that work?

1. Enter your First Name(s) and email address in the form below.
2. Receive a Step-by-Step **Convert Your Power Bill to Solar Equity™** information packet by email. (Budget is not affected. Take NO money out of pocket.)
3. Return **Power Bill Solutions Home Survey**.
4. Discuss your questions and review your responses by phone.
5. **Convert Your Power Bill to Solar Equity™** is a great option to consider?
6. We arrange an appointment. We review the areas and devices that create your high electricity demand.
7. We agree upon the most cost-effective solution that combines

1. Minimizing the root causes of your high electricity demands and
 2. Configure you solar grid to provide the power for remaining demand
8. **GET THE TYPE OF SOLAR SAVINGS SHOWN IN THE CHART ABOVE**
